## Professional Summary

SAP Basis Administrator with 3+ years' experience on **Azure-hosted SAP landscapes (Oracle DB)**. Proficient in **SAP ChaRM, STMS, SPAM/SAINT**, and system monitoring; consistent record of smooth, on-time go-lives. Certified **AZ-120** (SAP on Azure) and **PL-300** (Power BI). Additional exposure to **Java/Spring Boot**.

## Work Experience

### Tata Consultancy Services

*SAP Junior Basis Administrator*

Kolkata, India

Sep 2023 – Present

- Managed transports end-to-end via **SAP Solution Manager (ChaRM)** and **STMS** across multi-system landscapes; improved change success rate to ~99%.
- Planned and executed production cutovers/go-lives on **Azure VMs** (ASCS/ERS + app servers, Oracle DB); achieved zero Sev-1 post-release incidents.
- Executed core **SAP Basis operations**: **SPAM/SAINT** package updates, **kernel upgrades**, SNOTE, SPDD/SPAU adjustments; maintained secure transport routes and domain links.
- Monitored and tuned systems using **ST22, SM21, SM37, ST02/ST03N, ST04 (Oracle)**, and EarlyWatch; reduced MTTR by ~30% via proactive alerting.
- Administered client copies/openings (SCCL/SCC9), RFCs/ports, background jobs, and user/role provisioning (SU01/PFCG) per SoD guidelines.
- Coordinated dual-track retrofits and defect fixes; ~200+ transports/month with audit-ready documentation in ChaRM and Jira.

### Wipro

*Java Full Stack Trainee*

Hyderabad, India

May 2022 – Jul 2023

- Built a real-time weather app (Angular + Spring Boot) integrating OpenWeather API.
- Implemented MongoDB (history) and MySQL (authentication); developed modular UI and REST APIs.

## Selected Projects

### ENGIE Release Management

2023 – 2025

- Automated change migrations with **SAP ChaRM**, reducing manual errors and cycle time.
- Drove multiple production go-lives with clean post-deployment health.
- Orchestrated weekly/monthly release trains across ~200+ transport requests.

### SAP System Landscape Optimization

2023 – 2024

- Designed/validated 3-tier landscape (Dev/QA/Prod) on **Azure** with secure CTS+ routes and SolMan integration.
- Executed **kernel upgrade** and **SPAM/SAINT** updates; documented SPDD/SPAU remediation and rollback plans.
- Implemented monitoring baselines and EarlyWatch actions; stabilized batch failures (SM37) and dumps (ST22).

## Skills

**SAP Basis:** ChaRM, STMS, SPAM/SAINT, Kernel Upgrades, SNOTE

**SAP on Azure:** VMs, Availability Sets/Zones, Load Balancer, Backup/Recovery

**DB/Integration:** Oracle (BR\*TOOLS/RMAN), RFC, CTS+

**Dev/Tools:** Core Java, Spring Boot, REST APIs, Jira, Git, Docker

## Certifications

- ✓ AZ-120: SAP on Azure (Microsoft)
- ✓ SAP Basis Administration (OpenSAP)

- ✓ PL-300: Power BI Data Analyst (Microsoft)
- ✓ Java Full Stack (Wipro)

## Education
